

```
<div> ↵  
  {% if True %} ↵  
    yay ↵  
  {% endif %} ↵  
</div>
```

By default, rendering keeps the whitespace before and after Jinja2 blocks.

```
<div> ↵  
  yay ↵  
</div>
```

```
<div> ↵  
  {%  
- if True %} ↵  
    yay ↵  
  {% endif %} ↵  
</div>
```

The `-` sign removes the whitespace between it and the previous character.

```
<div> ↵  
  yay ↵  
</div>
```

```
<div> ↵  
  {%  
- if True  
- %} ↵  
    yay ↵  
  {% endif %} ↵  
</div>
```

Here, it removes whitespace between it and the next character.

```
<div>yay ↵  
</div>
```

```
<div> ↵  
  {%  
- if True  
- %} ↵  
    yay ↵  
  {%  
- endif  
- %} ↵  
</div>
```

```
<div>yay ↵  
</div>
```

```
<div> ↵  
  {%  
- if True  
- %} ↵  
    yay ↵  
  {%  
- endif  
- %} ↵  
</div>
```

Remove all whitespace with 4 `-` signs.

```
<div>yay</div>
```
